About Me.

Creative Technologist building across the full stack, from interaction and front-end craft through backend systems. Currently seconded to Adobe, leading the engineering behind generative pipelines across the firefly ecosystem. Recently build a computer vision system for the Wimbledon Championship 2026, turning live ball tracking into real time 3D audio for BLV audiences. Prototyping fast and working comfortably with ambiguity. Four years producing live events has taught me what happens when an idea meets a deadline.

HEX Agency, WPP

Creative Technologist - (July 2025 - Present)

Creative Technology Apprentice - (October 2024 - July 2025)

Creative technologist at HEX, WPP's global creative technology collective, building experiential, digital and hardware led work for major brands. From concept to prototype, to live delivery and maintaining long after.

- * **Action Audio, Wimbledon Championship 2026** - Designed and ran a computer vision tracking system converting live ball and player data into real time 3D audio, letting blind and low vision audiences follow the match. Owned end to end, through to live operation across the tournament.
- * **Smart Connect** - Wearable conference device which exchanges contact details when two people shake hands. Built the full stack; backend server, iOS app, PCB as well as device firmware.
- * **WPP Open** - Development on WPP's global agentic marketing platform, refining digital experience and interaction.
- * **Bibigo Scroll** - An nRF52 BLE controller housed in a chopstick, uses flick gestures to scroll allowing you to eat and scroll on TikTok at the same time. Built the full stack, C firmware, PCB design + casing design.

Forward Deployed Creative - Adobe

(July 2026 - Present) adobe.com

Seconded to Adobe developing AI workflows for major clients across the Adobe Firefly ecosystem. Overseeing the initial engineering effort to build the system frameworks for different generative pipelines which will then be refined for brand specific use cases. Full-stack frontend and backend deployment.

Creative Event Producer - Wax Palace

(March 2020 - October 2024) [@wax.palace](https://www.waxpalace.co.uk) www.waxpalace.co.uk

Creative Producer for successful UK-wide events business from concept through to delivery, curating immersive, design-led events, including an annual 500 capacity festival and regular club nights across the UK. Worked as operations director for the Kaleidoscope festival, ensuring smooth build and break and operation running during the event. Creative producer and art director for club night events across the UK, working with large venues and companies, including Boiler Room. Using experimental design to reflect the music and artists performing, combining practical design elements with electronics and creative coding for emmerise set design and installations.

Skills + Proficiencies.

- * **Web + Software**
React, Next.js, TypeScript, Python
- * **Creative Web + 3D**
Three.js, p5.js, Unreal Engine
- * **AI**
LLM APIs, Agent Workflows
- * **Physical + Embedded**
PCB design, C / C++ firmware

- * Rapid Prototyping
- * Cross Team Collaboration
- * Playtesting + Iteration
- * Project Management
- * Team Leadership
- * Creative Design
- * Budgeting
- * Flexibility + Adaptability

Education.

Creative Technology Apprenticeship, WPP
October 2024 - June 2025

BSc Biotechnology with Enterprise - 2:1
University of Leeds, 2019 - 2022
